

## **Guajome Learning Centers**

---

### **Curriculum Selection**

Guajome Learning Centers is dedicated to providing a wide-range of performance-based educational possibilities for all students. These choices will be based on California content standards and will partner with families, businesses and post-secondary institutions to create unparalleled choice for GLC students. The Guajome Learning Centers' Curriculum Matrix lists the curriculum options available for GLC home school students. Materials will be provided upon choosing one publisher from each of the subject areas. These options do not preclude families from using other materials and resources, however; Guajome Learning Centers will only assess student performance using the tools provided by the publishers listed in the Guajome Learning Centers' Curriculum Matrix.

Additionally supplementary materials will be provided based on the nature of the course and grade level objectives. Students will be required to take all GLC assessments, both state mandated and internal benchmarks as outlined in the GLC course catalog.

Guajome Learning Centers' advising teacher(s) will provide each student with a Personalized Learning Plan (PLP) monthly. The PLP will outline goals and objectives, and provide timelines for meeting those goals and objectives. Meetings will be scheduled regularly to assess student progress toward the established goals and objectives described in the PLP.
